Capability Statement

1. Overview

South River Technologies (SRT) designs and markets simplified content management products for collaboration, shared access, website management and other **information sharing** intensive tasks. The company's products are secure, require minimal end user training, and limit ongoing IT department resource use. SRT's client file management technology uses the familiar Windows environment rather than a separate interface. Founded in 1996, South River Technologies directly sells and markets its products to government agencies through its resellers including solution partners, integrators, and other channel partners.

South River Technologies discriminators:

- 1) Low complexity implementation with existing IT assets
- 2) Drive letter mapping feature is a familiar windows based interface, which requires minimal user training. Eliminates the need to open a separate FTP or document management application.
- 3) Client and Server file management products based on open standards including FTP, SFTP, and WebDAV
- 4) Highly secure products based on SSL, SSH, and S/Key encryption, which eliminate need for dedicated VPN
- 5) Client product web enables any application including support for DOS/legacy based applications

2. Products

- 1) **Cornerstone MFT** – securely manage file transfers and gain unprecedented visibility into your data flows
- 2) **GroupDrive** – centralized collaboration/file management suite based on the WebDAV protocol
- 3) **WebDrive** – client side product integrated into the windows environment with drive mapping feature
- 4) **Titan FTP Server** – secure, highly featured with granular controls at server, group, or user levels

3. Services

- Packaged Software Development
- Custom Software Development
