### **South River Technologies Launches WebDrive 8.0**

*Award Winning Product Includes Support for Amazon S3 and Windows Single Sign On*

**ANNAPOLIS, Md.—January 23, 2008**—South River Technologies, Inc., (SRT) an innovator in secure file transfer and collaboration software, today announced the availability of WebDrive 8.0, a Universal Access Client that enables users to securely access, manage and collaborate on business documents. WebDrive users can access files stored on remote servers including online storage and backup services, online collaboration services, corporate web servers and file management servers – all through one simple, intuitive interface.

WebDrive 8.0 includes support for Amazon S3 (Simple Storage Service). Amazon S3, provided by Amazon Web Services, is an innovative pay-as-you-go Web storage service that allows users to store and access data on Amazon S3 servers. Launched earlier last year, the service is particularly valuable to growing startups on a tight budget as it enables companies of all sizes to utilize the inexpensive, scalable infrastructure to build their businesses.

Always on the forefront of the latest technology trends, SRT has upgraded WebDrive 8.0 to support Amazon S3. WebDrive also supports several industry-standard protocols that enable secure file transfer including WebDAV, SFTP, SSL and FTP, making it a universal access client to a wide variety of remote storage servers.

WebDrive 8.0 also includes support for Windows Single Sign on, which increases productivity of end users' on the corporate network by relying on the credentials of the logged on Windows user to connect to the server. This also simplifies administration and support for a company's systems administrator.

“This release of WebDrive really reflects response to customer demand,” said John Glavin, co-founder and CTO of South River Technologies. “As SRT customers take advantage of new protocols and storage technologies, we are quickly responding to provide the integrated, intuitive access that our customers have come to rely on with WebDrive.”

**About South River Technologies**

South River Technologies is an innovator in secure file management and collaboration software. The Company's software allows users to access, manage and share files over the Internet in order to automate and streamline business processes and enhance productivity. SRT's products enhance customers' existing applications by instantly enabling secure access and Internet file sharing within those applications. More than 55,000 customers in over 110 countries use SRT's software to make remote file access and collaboration more efficient for their customers, partners and distributed workforce.
